Church Of Robotron

2012 to 2015

The Church of Robotron is an ongoing collaborative series of immersive, interactive multimedia installations which present a cautionary message about machine superiority and human error. Effects include kinetic sculptures, whistles, percussion, vibration, ozone generators, electrical discharges, simulated fires, and projected video of the current and previous participants, and live performances, all triggered by audience interaction. Installations are customized for the space and opportunity, and can include unattended public interaction at all hours performed by the audience touching a plate glass window or manipulating a ruggedized control.

Exhibits:

XOXO 1010 Art Show, September 2015.
AFRU Gallery, February 2015.
Diode Gallery, September to October 2014.
ToorCamp, Neah Bay, Washington, July 2012.

Publications:

Doctrine And Documentation, pamphlet, 2014.

Presentations:
